

SUICIDE RUN

V1.4

CREATED BY WET NOODLES

JULY 2006

Fine fine... I had room for ONE LAST UPDATE. This is definitely the last update. One last map has been removed, and of course, replaced. I have something else in the works. Much better than this. Not saying this is bad....

:P

Changes:

This last version of the netpack has many changes. The map "1,001 Squares that I got lost in..." has been removed, and replaced with: "You aint finished, human."

Also, the map "Tulips & Daisies" has also been removed, and replaced with "Phfor crap Phfor You!" a map made by my friend, Cheyenne K. Many balance errors are fixed, bugs on SR, Power Tower, and PT (night) are fixed. Unless there is a big bug found, this is the last version.

The maps are:

"You aint finished, human"--new

"Power Tower"--night and day versions

"The 7rue Blue (CTF)"

"Aquatic Life and DEATH Center"

"Phfor crap Phfor You!"--new

"Too high to Fall..."

"Suicide Run"--Co-op

Final notes: These maps were created with the Infinity textures, but they can be played with M2, it just doesn't look as nice as it does with Infinity. Also, 7rue Blue is used with W'rkncacter's CTF lua, not Aleph One's built it CTF mode. And last: What is the most important thing?

Uhh..Marathon rocks? Err... your kinda right...In the video gaming category, but in this category? ENJOY!!! DUHHHHHHHHHHH!!!! :)

Thank you,
